Book Descriptions:

Crofton Crock Pot Manual

I was impressed. Might take a couple tries before you get it, but then you'll see that it works every time. I grabbed this blurb from a Ronson Slow Cooker Manual. Not the same model, but it has the same settings. On Setting 1 Low the Slow Cooker can operate all day and night if required. When set to 2 High it is very much like a covered pot on the stove. How do I put Login to post Hope this will help you. Regards, Dennis I am concerned with the 300 watt is this normal. Or is that very low. I don't know how long to cook in this or amounts. The setting you choose determines the length of time the food will cook. The setting simply determines how quickly the cooker will reach that temperature. 300 watt is not a huge consumption of electricity, depending of course on, how often, how long and how high temperature. Regards The high and low settings are more like those of a microwave rather than a direct temperature setting. On high, the slow cooker uses full power 35 watts. I hope this helps. Cindy Wells In one place it says 34 watts. In another it's 340 watts. I can probably locate a user's manual with that information. Try this site to locate the manual my best guess without a model number 209k Find the little blue print that says enter security code and then you can download the manual. The Power light will begin to flash indicating that the unit is plugged in, but not turned on. Push once and the 4 hour light will illuminate, twice and the 6 hour light will come on, etc. Select the time based on the length of time indicated in the recipe. Two time options are usually given. The 4 and 6 hour settings are the HIGH temperature setting and may be used when you want your food done quicker. The 8 and 10 hour settings correspond to the LOW temperature setting and is used for all day cooking. If cook time is changed before the cycle is complete the time will reset to the new setting. Thanks for choosing FixYa, Kelly Thanks You cannot enter the desired temperature in degrees. <http://www.lvb.eu/userfiles/canon-mx860-manual-for-mac.xml>

The design of this model's controls is terrible. I have one and would not recommend this to anyone. There is a I then a II then a picture of a crockpot with what I think is supposed to be steam coming off the lid. Why all the runaround. This should be simple. Selecting a time more than 7 hours will result in cooking on low. Once the cook time has expired the cooker will automatically switch itself to warm until you turn it off. Follow these steps and you should be able to enjoy your cooker again. I don't know who was in charge of this type of setup for programming but they should be demoted at least no wonder there are so many questions online about this one. Sure hope this helps you! New crock, on the way. I haven't used it for very long yet, but hopefully this brand new crock will last longer than the used one. Mom to the rescue."I'll just get you a new liner.". He didn't know that was a option. The liner is perfect, fits properly, performs as expected.

Still in all I was happy to get a replacement. I left the stoneware on an electric burner and turned on the wrong burner and ruined it. My original had black stoneware and my replacement is red, but even though it rocks a bit in the base it cooks food well. I ordered the wrong one and shipping was so much I just trashed it and the crock pot I was buying the insert for. Its too small. I dont know what to do. Having fun! Ordered online at a good price. Item received on time. Item was well packaged and receive in excellent condition. The crock cracked and I was getting ready to recycle the pot and use the crock for a planter when I had a brainstorm to check and see if they made replacement crocks. The internet search showed none in stock but I called and the rep said my red was indeed not available but I could get the crock in black. I bought this and it has brought a new life to our slow cooker. Its like its brand new. Im so glad we didnt waste money buying a new slow cooker all together and just bought this stoneware. But I order the wrong size, so it was returned Word to the wise Do NOT place the stoneware on a stove burner to rewarm. That's how I cracked the original pot. Love my crockpot! It is worth the money. How do I go about sending it back and getting the correct one The order came in promptly and best of all. wrapped soooo very carefully. We were impressed with the time and effort taken. Grateful to receive it and ready to use. I was going to buy a new one, but glad I checked out a replacement stoneware first. Works great and half the price of buying a new one. For once I thought of looking online first and I found the exact same one right away. It arrived safely thanks to lots of bubble wrap in about a week. Great service!!! Recently I broke the stone crock and ordered the 6.5 qt replacement crock. When I received it, it was too big and did not fit. I then ordered the 4 qt and after receiving it, it was too small. Very disappointing.

Im so glad we can get replacement parts so we dont have to litter the landfills. I was happy to order this piece instead of an entire new crockpot not only for cost but for the waste of throwing the base and lid away when they still worked perfectly. Check out the serial number on the base if you dont know what size you need. I think most of the negative reviews are from people not doing research or asking questions. Made a few dishes already. Works great. We love beans! It was so short the metal of the crock unit was showing. My lid did not fit it either. Lid does not fit as it did the original, allowing large amount of heat to escape. I would, however, recommend it how else could I have gotten a replacement for the broken stoneware I tried the crock from my CrockPot and it fit and the shipping was more reasonable and it was on sale. I do wish that the warm setting was a little cooler. food still bubbles on that setting and is still cooking. I set the crock liner in the sink and filled it with warm soapy water to soak and when I came back all the water was gone. There is a big crack down the side and into the middle and all the way, long ways, across the bottom. Huh! No idea what caused it to do that. I do not know what size to order 4 or 6 qt. Does not say on the labeling. Please upgrade your browser to improve your experience. Watch our New to the Forum. I had had good experiences with cookware purchased from Aldi and the price was right even if it turned out to be a bust. I picked this PC up about two years ago and its still going strong. For someone who was nervous as hell about using a PC, the product itself is very sturdy and hasnt ever made me concerned about betting my life on projectile beef stew. Its got a lot of nice safety features and is a pretty decent size. This is definitely a good investment if you want to see if pressure cooking is for you. Glad to hear you like it. Been waffling about it for a while but will probably pick it up now. Im also eyeing the turkey deep fryer for my sister, lol. Solid cooker with all the safety features.
